Dear Dan

I am pleased to report that the Fort Wayne Radio Club has been officially renewed as a Special Service Club. Through the work of your officers and members, your club is recognized for its continued efforts on behalf of Amateur Radio and service in your community.

Your club will continue to receive periodic mailings of materials and information from Headquarters.

Congratulations and if I can assist your club in any way, let me know.

Meeting Date and Time 3RD FRIDAY MONTHLY, 7:30 P.M.

Total club membership 217 (193 VOTING MEMBERS PLUS 24 NONVOTING)

Has club submitted this year's Annual Report Form ☒ yes ☐ no

(Note: The club must be actively affiliated with the ARRL, and have submitted this year's Annual Report form to be considered for Special Service Club Status.)

We the undersigned, being officers of the above named club, and authorized to act on behalf of its members, do hereby submit application for Special Service Club status. We understand that this is not a contractual agreement, but rather a commitment between our organization and the ARRL to provide greater support for Amateur Radio.

As a Special Service Club or SSC applicant, we agree to carry out the responsibilities of such clubs and understand that the ARRL will honor its commitment to the program. In the case where differences prove to be irreconcilable after sincere extended effort at resolving them, either party of the agreement, the club or the ARRL, may withdraw from a continuation of the agreement.

President Lynn E Hyndman W9FC ARRL Liaison Ronald J Kozor, K9TUS

List separately, a detailed description of each program (A-F). Under categories (A-E) below, name the activity in which your club or organization has implemented a program. Under category (F), list 3 programs or activities covered. Copies of any newspaper articles, newsletters, letters of thanks or other related material describing your group's program may be used to supplement your report.

- SEE ATTACHED SHEETS

FORT WAYNE RADIO CLUB
REVIEW OF 1983 SSC ACTIVITIES

A. PUBLICITY. On Saturday, December 17, 1983, eleven FWRC members visited the three local hospitals' children wards with their two-meter HTs to allow the children to talk to Santa via the radio. About 47 messages to the North Pole were handled by the amateurs and "Santa." See attached report from the February 1984 issue of the FWRC newsletter, HAMSPLATTER.

A special event station was operated on July 7, 1984 in conjunction with Fort Wayne's Three Rivers Festival. The station operated at a central festival location and included a static display explaining ham radio and a message center from which about 20 messages were passed for the public. Since this was an official festival activity, it was included in all festival printed schedules and publicity.

B. EMERGENCY PREPAREDNESS. FWRC members continued their participation in the National Traffic System. About a dozen club members are regular participants in both CW and SSB traffic nets.

Joe Knight, WB9PXT, is a FWRC member and Allen County EC. Joe presented a program at the regular club meeting in May on the reorganization of the Allen County Sheriff's Emergency Operating Center and its effect on the amateur communications performed at EOC. Joe also showed the new video, "At Any Moment."

FWRC upgraded its power distribution trailer this year prior to Field Day. The trailer is used to regulate and distribute AC power from a portable generator to multiple loads. The trailer is used annually in our Field Day exercise and is available for emergency use.

FWRC purchased new coax in June 1984 for our emergency antennas which are maintained for Field Day and emergency use

C. TRAINING. Code and Theory Classes were held for Novice Technician and General Class licenses in November 1983 and March 1984. Each session had about 40 participants. Classes for Advanced and Extra were offered in November but were not held due to lack of applicants.

The club's Elmer program continued with several new members being helped.

D. TECHNICAL ACTIVITIES. The July 1983 meeting program featured a discussion/demonstration on the use of the VIC-20 computer with the local two meter message storage/mailbox system in operation here.

Several articles appeared in the club newsletter which covered technical topics. Two of these are attached as examples.

FWRC donated three QST subscriptions to the local library system for branch library use. See attached letters.

Our program of "Tech Talks" after our monthly meetings was a dismal flop. Only a few members attended...no matter what the

topic. Apparently, meeting nights are not the time for such discussions.

E. OPERATING ACTIVITIES. FWRC operated Field Day both in 1983 and 1984 (4A in 1983; 3A in 1984). In addition the club operated two special event stations this year. A station was set up in Valentine, IN. and operated in conjunction with Valentine's Day. The other was operated (in association with the Allen County Amateur Radio Technical Society) during the Three Rivers Festival.

The FWRC operating awards program continued in effect this year. members are encouraged to earn plaques and other awards by participating as FWRC members in various major contests. Among these are the CQ WW DX contests, ARRL DX Tests, Sweepstakes, ARRL 10 meter contest, Novice Roundup and VHF Sweepstakes.

F. MISC. ACTIVITIES. FWRC continued publishing its monthly newsletter, HAMSPLATTER, maintained its permanent P.O. box address and printed and distributed several informational handout sheets.

FWRC has initiated a program to contact new amateurs in this area. An invitation letter and several other flyers are sent to each one. Each receives several newsletters as a reminder of the meetings each month. See attached sample of letter.

From February 1984
HAMSPLATTER

The HAMSPLATTER is published monthly by the members of the Fort Wayne Radio Club. All items to be published are required by the editor before the first Friday of the month.

President: Lynn Hyndman, W9FC Secretary: Ron Koczor, K9TUS
VicePres: Larry Joy, KB9C Treasurer: Mike Lamb, WB9TBY
Editor: Ron Koczor, K9TUS

MEETING NOTICE

This month's meeting is on Friday, February 17, at 7:30 pm at the Salem Church on Lake Avenue...same place...same time!

This month's program will be given by a member of the Parkview Hospital staff. He will tell us about the newest machines used to replace or supplement X-rays. These are the CAT scanners and the NMR scanners...definitely spaceage stuff! There may be a film on the subject as part of the presentation.

In addition, we'll have the club's 1984 callbooks available for your use...both stateside and foreign. We'll also be raffling off the club's 1983 callbook and supplements, plus some other callbooks of recent vintage which were donated to the club. If you'd like a set of only slightly used books, come to the meeting and take your shot! We were going to do this last month but never got around to it. Note, too, that we have a brand new set of 1984 callbooks to sell. See the For Sales in this issue.

Of course we'll have our table of goodies in the back of the room...information, contest forms, newsletters etc. Everything the active ham needs to keep up to date with our fast-paced hobby!

Mike, WB9TBY, will be very happy to take your 1984 dues, your club QSL card orders and your ARRL memberships.

See you there!

SANTA HOSPITAL VISIT...FEEDBACK

Joe, WB9PXT, reports that he has received thank you notes from both St. Joe and Luthern Hospitals for our Santa Hospital Visit held last December.

Sheila Lohstroh, with Luthern, writes, "Your Christmas gift to our patients this year was more fun than ever. The feedback I received was so positive and appreciative. You did a superb job 'hamming it up!'"

As you know, many of the patients you visited have been bedridden for some time and really needed some cheering up..."

The pediatric nurses of St. Joe wrote, "Thank you so much for all of your efforts in arranging for the Radio Club to come and have the children talk to Santa. We really enjoy it every year and appreciate your time and effort. Thank you for caring."

Not bad for a couple of hours work on a Saturday afternoon!

VOLUNTEER EXAMINATIONS

IRCC BISON

The new Volunteer Examiner Program is now in effect; however, at the present time, there will be no volunteer tests given except for Novice tests since there is now no Volunteer Examiner Coordinator. In a recent discussion with FCC, only one application has been received from a group covering Alaska. The Dayton ARA is planning to become a VEC to cover 8-land.

ARRL is drafting their request and another "national educational" institution is considering becoming a VEC. In addition, the Indiana Radio Club Council, IRCC, is also considering VEC status for 9-land and is investigating the possibilities.

An IRCC committee was appointed at the October meeting to determine if IRCC should apply for VEC status. According to the committee finding, costs seems to be within reach...especially since the Indianapolis Hamfest Committee has indicated that it would help IRCC cover costs. The IRCC approach would be to team up with clubs in Illinois and Wisconsin to provide region-wide coverage.

The largest stumbling block appears to be with the day-to-day administration of the program. It would require about 4 hours each week and would have to be a daily effort to handle incoming mail. The idea would be for one of the Indiana member clubs to assume the responsibility for administering the program. An assigned individual would keep all records for FCC. The club and individual would be performing this function under a committee appointed by IRCC, which would be the actual VEC.

There are many clubs who have retired persons who could spend the time to do the work. It would greatly enhance the status of the club in its community.

IRCC will receive a recommendation from its committee as to a course of action. This will be voted on and action will be taken to apply for VEC status (if that is the decision).

The next IRCC meeting is in early April.

WORKED FORT WAYNE AWARD

Ron, K9TUS

Want a handsome certificate to grace your shack wall...for pennies? Want to meet some new FWRC members on the air and talk to someone you only see once a month? Bunky, have we got a deal for you!

I'm talking about the club's own "Worked Fort Wayne Award" certificate. Gordon, WB9UBF, reports that he's handed out 81 certificates since the program started a few years ago. Of those 38 went to overseas hams.

The certificate is a handsome 8 1/2 by 11 brown parchment-type finished paper which features the Old Fort. The certificate is available to any amateur who works the required number of Fort Wayne Radio Club members. DX stations must contact 5 FWRC members; statesiders, 10; and locals must contact 25 members to get the award. Any band...any legal mode (and that includes two meter repeaters).

All you need do after the QSO is to list the calls, names, dates, times and bands for each QSO and mail it off to Gordon Mattoon, WB9UBF, or give it to him at a club meeting. Locals

LIGHTNING PROTECTION

Jerrold, W9CZI

The following was picked up from the Michiana ARC SPARKS newsletter (South Bend, IN).

The advent of solid state devices into the ham shack has resulted in improved equipment. However, these devices are very sensitive to static discharges and over-voltage (transistors make dandy fuses!). It is therefore mandatory that surge protection be incorporated into the ham shack and computer room. These surges can enter the equipment by both line transients and lightning strikes.

A lightning bolt can induce charges into an antenna without directly hitting it. The damage to your radio can be caused both by high voltages and high currents. The voltage causes breakdown of the sensitive electronic components while the current causes thermal and mechanical failures.

To reduce the probability of lightning damage one should make use of:

- 1). A good outdoor grounding system for ALL antennas...both beams and long wires.
- 2). Lightning protectors on all transmission lines and,
- 3). Surge protection on house wiring.

A well-grounded tower needs ground rods at least 8 feet long located at a minimum of four equally spaced points around it. Rods should be connected to the tower with no less than #8 copper wire. 1/8 or 1/4 inch copper tubing is even better. The connection should be made to the nearest tower leg to the rod. Note that the diameter of the grounding rod is not as important as its length. Four foot rods are just not long enough to dissipate the charge from a lightning strike into the ground. Note that this is definitely one case where the old rule "more is better" applies!

If you are considering a radial system to improve an antenna efficiency, bear in mind that the grounding system is of little help. The two needs are almost independent of each other.

Line transient protectors in the shack not only provide protection against lightning-induced voltage swings, they reduce problems from motor start-ups or fuses blowing.

The old spark gap lightning arrestor that worked well with tube-type equipment has too high a voltage breakdown. That is, the damage has been done to your transistors before the arrestor begins to work! There are several devices currently being sold that have small, partially ionized gaps. These units, when properly installed, will shunt out the surge before it reaches the rig. Install Metal Oxide Varistors (MOV) on the power line, connecting each line to the grounding conductor (green lead) as well as from the neutral to hot (white to black). Units are available at various computer or electronic stores.

The best protection is to keep the surge from entering the shack in the first place. The charge will leak to ground on a well-grounded tower. For long wire antennas, using open wire feeders, a large DPDT antenna switch can be used to ground the line to a heavy conductor leading to an outside grounding

June 1984 HAMSPLATTER

rod. If your antennas use coax, then a coax switch which grounds all antennas when not in use is the way to go. When your station is closed down, all antennas should be properly grounded.

Even with a good antenna grounding system, there is little that can be done to protect against the damage of a direct strike. But by observing the above, as well as disconnecting the equipment from the antennas and power source, you can minimize the physical and electrical destruction.

For further reading see CQ magazine, August, 1982 and Ham Radio, December, 1983.

NEWS FROM MURPHY

Gene, W9JBD

Welcome to the Murphy Repeater. Murphy is pleased to offer the Fort Wayne ham community the features of an Advanced Computer Control model RC-85 repeater controller.

The following features are on line for your use:

1. Touch Tone pad test. Enter 5 on your Touch tone (TT) followed by the keys you wish to test on your pad. "Mr. Murphy" tells you which tones are ok.

2. Bulletin Board Message. Enter (TT) 37 on your pad and you'll hear the recorded messages. Let us know what message you want us to put on the machine...it's open for you.

3. Meeting message. Enter (TT) 38 on your pad and you'll hear what meetings are being held. Let us know about your meetings and we'll put them on the air for you.

4. Demonstration Messages. Enter (TT) 31...cw identifier,
" (TT) 32...voice identifier
" (TT) 33... "
" (TT) 34... "
" (TT) 35... "
" (TT) 3*...commercial for the
ACC RC-85 controller
" (TT) 30...voice identifier
" (TT) *11...demonstrates the

autodial autopatch feature (programmed for 422-0123). Note: the phone line is not yet hooked up.

5. Weather Alert. Either a morse code "WX" or voice weather alert message is heard on the repeater during weather alert conditions. This is activated by NOAA weather broadcasts.

6. NOAA Weather Broadcast. Ask a control operator to activate the Weather radio broadcast on the repeater. Enter (TT) # to deactivate the broadcast. Note: you can talk on the repeater while the weather broadcast is on.

7. External Device Control. A high pitch tone tells you that this feature is on while a low pitch tone tells you that it is off. Enter (TT) 91 to learn the current condition (high or

From October 1983
HAMSPLATTER

excerts have been aired on at least one. Two radio stations and four newspapers in the area have already received the media print releases and two have already printed leader stories. If any local ham is planning to try a STS-9 contact with astronaut Garriot, please give me a call so that I can add your name to the list for release to the media. For readers outside Allen County, I will provide media copy for you to give to your newspaper and radio stations. My number is 483-9319.

The contest season is getting underway. If you haven't sent in for your Sweepstakes, CQ World Wide, or ARRL 10 meter contest logs and entry forms, let me remind you to do so. Better still, come to this month's meeting and I'm sure that Ron, K9TUS, will have some in his tote box!

I only received one entry for the September VHF QSO Party. Surely there was more participation than that in a club this size! Send me a copy of your entry form as this event is now recognized by the club for an operating award.

By the time you read this, SET '83 will be history. Halos to you if you participated...horns if you didn't. Public service is an integral part of ham radio and probably the prime purpose in our license charter. Are YOU ready to participate should there be an emergency? I'm not talking about your rig, your shack or your equipment. I'm talking about YOU. File a message on NTS. Learning how to do that is the first step in learning to operate in an emergency. It will help sharpen your skills and brighten the day of whomever you send the message to!

THE SHUTTLE TURNSTILE ANTENNA

Lloyd, WD9EWT

The August issue of QST (page 51) has an article on the recommended omnidirectional antenna for those planning to contact the shuttle Columbia later this month. I built the antenna and tests I ran confirm the omnidirectional characteristics and overall performance of the design.

I used 1/4 inch copper tubing for the antenna elements and a 2 by 2 for the mast. I used 20" long tubing for each half of each dipole. The reflector screen was made of aluminum window screen on a lathe board frame. The screen frame is 46" square and is 6" from the dipoles.

I used RG-58 coax for the feedline and the phasing line and RG-59 coax (75 ohm) for the matching line. The matching and phasing lines are 13 3/8" long.

My antenna has a 1.1 to 1 SWR at 144.0 MHz and 1.5 to 1 at 148 MHz. Using this antenna at a height of 20 inches above the ground, I am able to get into the .88 machine from Ossian with full quieting. No significant change in signal level is noted as I rotate the antenna 360 degrees.

Using the construction described above, I have a total of \$7 invested in this antenna!

FCC APPROVES VOLUNTEER EXAMS

The following info is excerpted from the October 1 W5YI Report.

FCC has adopted a Report & Order establishing volunteer testing (both preparation and administration of exams) for amateur operator licenses above the Novice Class level.

The purpose of the Order is to offset the limitations imposed on amateurs when they want to take license tests. Present opportunities are being restricted by budget and personnel cuts within FCC. In some areas license testing has dropped to once per year.

The R&O, adopted September 22, provides for written examinations to be administered by three person teams who will report to REGIONAL Volunteer Examiner Coordinators (VECs). The big surprise is that FCC departed from their original proposal and decided to substitute regional VECs for national VECs. The regions will coincide exactly to the present amateur licensing call areas, 1 thru 0, plus the Pacific, Alaska and U.S. Atlantic areas.

Specific requirements for the volunteer program are spelled out in the R&O. All Morse code tests and the Advanced and Extra Class exams will be given by a team consisting of three Extra Class licensees. Element 3 (General/Tech theory) can be administered by three Advanced Class licensees.

FCC ruled that no expenses could be recouped by charging the people undergoing test. This is a key demand by ARRL. As things stand now, all costs, including printing of tests must be borne by the VECs or the volunteer examiners themselves.

Note that this Order has no effect on the newly adopted Novice testing procedures.

Discussions between ARRL General Manager Dave Sumner, K1ZZ, and W5YI, indicate that ARRL is still interested in becoming the national VEC. According to Sumner, nothing in the R&O precludes a nationwide VEC and ARRL is still definitely interested. Sumner does admit that the hangup of cost reimbursement must still be resolved.

ED NOTE: It appears to me that not many groups will step forward to be regional VECs for an entire call area. Many states have organizations like IRCC which could handle the job on a statewide basis...but not an entire call area.

I believe that ARRL will end up being THE VEC and ARRL will assist Congress in writing legislation which will allow it to recoup reasonable expenses from those undergoing test (as is the case with other licensing activities such as driver's licenses, pilot licenses, etc.).

Overall ham radio will benefit by increased opportunity for testing and by the elimination of Dick Bash.

A SPECIAL EVENT STATION FOR FWRC?

Brian KA9OIH

Happy Valentine's Day to fellow club members. No, I haven't inhaled too much ether...this is my way of trying to interest you in a special event station next February.

THE FORT WAYNE RADIO CLUB, INC.

SINCE 1920

ARRL

September 20, 1983

225 Main Street

Newington, Conn. 06111

The FWRC is donating three subscriptions of QST to the Allen County Public Library. These issues will go to three of the library branches in Fort Wayne.

Enclosed is a check for \$69 which is \$75 minus the club discount. Please address the subscriptions as follows:

#1 Georgetown Branch
Allen County Public Library
Box 2270
Fort Wayne, IN 46801

#2 Hessen Cassel Branch
Allen County Public Library
Box 2270
Fort Wayne, IN 46801

#3 Little Turtle Branch
Allen County Public Library
Box 2270
Fort Wayne, IN 46801

Thank you,

Ron Koczor
Ron Koczor K9TUS

Secretary, FWRC

P.O. Box 15127

Fort Wayne, IN 46885

THE FORT WAYNE RADIO CLUB, INC.

SINCE 1920

Mr. Sheldon Kaye
Allen County Public Library
Box 2270
Fort Wayne, IN 46801

September 20, 1983

Dear Mr. Kaye:

As I noted in my telephone call earlier today, the members of the Fort Wayne (Amateur) Radio Club have voted to donate three one year subscriptions of the American Radio Relay League's journal, QST, to the Allen County Public Library. Since the main branch already receives QST, we want these to go to the three branches which you indicated receive the highest use: Georgetown, Hessen Cassel and Little Turtle.

We have notified ARRL and you should begin to receive the magazine in about two months. When you receive subscription renewal notification, please forward them to me.

The Fort Wayne Radio Club is a non-profit organization of radio amateurs having about 250 members in the Fort Wayne/Allen County area. Part of our public service activity involves dissemination of information about the Amateur Radio Service. It is to this end that this donation is made.

Regards,

Ron Koczor

Secretary, FWRC

P.O. Box 15127

Fort Wayne, IN 46885

F O R T W A Y N E

WHAT IS THE FORT WAYNE RADIO CLUB ?

FWRC is Lynn, W9FC, who spends his evenings passing messages on traffic nets...

FWRC is LaMar, W9LT, first class contest operator and DXer...

FWRC is Bill, WA9RAP, Novice instructor, twice a year...

FWRC is Bob, W9IFV, amateur TV operator and experimenter...

FWRC is Bill, KA9FQV, ex-CBer and now a proud Novice...

FWRC is Michelle, KA9FUL, licensed at 12 and now an Advanced Class operator...

Get the picture? FWRC is this and more. With over 250 members, FWRC has a depth of activity which covers every aspect of amateur radio...from operating the OSCAR satellites to chasing rare DX to ragchewing on 75 meters.

The club's monthly newsletter, HAMSPLATTER, is an award winner, supported by the club and offering a wide variety of articles and information.

WHAT DOES FWRC DO ?

FWRC is characterized by one word...ACTION!

FWRC operates a Field Day site each summer to keep our skills sharp.

FWRC offers ham radio classes twice each year for Novice, Technician and General class licenses.

FWRC holds a Santa Hospital Visit each year before Christmas. "Santa" talks to the hospitalized kids via two meter FM radio from "the North Pole."

FWRC tells the city about our hobby at the Glenbrook Mall exhibit, "The World of Amateur Radio" held during the Three Rivers Festival...a weekend of message handling and PR for amateur radio. This activity is co-sponsored with AC-ARTS.

FWRC holds a spring banquet and Christmas potluck.

FWRC helps its members send their QSL cards anywhere in the world through established bureaus and services at next to no cost.

SOUND INTERESTING ?

Well, it's only the tip of the iceberg! We'd like to have you join us. You can't imagine what we are or what we do until you get to know us better.

If you are a long-time ham looking for new activity and friends, we have something for you.

If you are a newly licensed operator looking for help or other newcomers, we have something for you.

If you are not licensed yet, but are interested in joining the ranks of one of the world's most popular hobbies, we have something for you.

We meet at 7:30pm on the third Friday of each month at the Salem Church of Christ, 2401 Lake Avenue, just east of the VA hospital.

It costs nothing to attend our meetings!

Join us!

B

FORT WAYNE RADIO CLUB
1984/1985 SSC PROGRAM

A. PUBLIC RELATIONS.

1. Generate favorable publicity with local radio and TV stations. Continue efforts to schedule appearances on "local affairs" broadcasts.
2. Support Bill Hall, WD9HII, local PIA in his publicity efforts.
3. Continue efforts to maintain a good working relationship with city and county government officials.
4. Hold "Santa Hospital Visit" again just before Christmas.

B. EMERGENCY PREPAREDNESS.

1. Continue support of NTS thru members' participation in various nets within the system.
2. Continue maintenance and expansion of the club's emergency communications equipment which presently includes three towers, several wire and beam antennas, rotors and associated wiring and a power distribution trailer.

C. TRAINING.

1. Organize Spring and Fall Code and Theory classes.
2. Update and publicize club list of "Elmer" volunteers.
3. Support member participation in the Volunteer Examiner Program.

D. TECHNICAL ADVANCEMENT.

1. Expand donation of technical publications to public library.
2. Continue technical meeting programs and articles in newsletter.

E. OPERATING ACTIVITIES.

1. Continue Field Day exercise.
2. Continue club contest awards program with emphasis on member participation as FWRC members in various major contests.
3. Operate special event stations for Valentine's Day and other appropriate occasions. One possibility under consideration is to operate during a small town festival near Fort Wayne (Harlan Days).

F. MISC. ACTIVITIES.

1. Continue publication of monthly newsletter.
2. Continue monthly club meetings.
3. Update informational handout sheets.
4. Continue dissemination of ARRL bulletins and other ARRL material both in the newsletter and at club meetings.
5. Continue permanent mailing address.
